**WHERE:** Pala Shooting Range - Pala Indian Reservation San Diego, CA

<http://range.palatribe.com/>

## Course Description

Course curriculum will be comprehensive and the tasks of each day are paced at a high tempo. Individual skill assessments are made at the beginning and end of this course. Continuous feedback and information is given to the student so that you have something tangible to document your progress.

Due to the nature of this course, very little time is spent in the classroom. Range time is balanced to insure that each student builds to and meets or exceeds performance goals set for this class level. Each skill set is built upon fundamentals logically layered through each stage of this class.

Full spectrum of rifle use from 10 yards to 890 yards (Maximum available at Pala) will be covered.

### Emphasis will be on:

- \* Non-traditional shooting positions.
- \* Rapid deployment and setup.
- \* Obstacle Avoidance
- \* Setup and executing from irregular surfaces, vehicles and roof tops.
- \* Position sustainment.
- \* Practical use of Ballistic Data and programs
- \* Reticle Hold vs. Dialing Methods.

\*\*CONTINUED ON PAGE 2

## Course Description continued from page 1

- \*Multiple target engagements.
- \*Elevated position considerations.
- \*Moving target engagements.
- \*Wind Estimation
- \*Time Management
- \*Blocks of tripod work everyday.

- Crisis marksmanship fundamentals .

\*\*Many other topics worked and discussed.

**\*\*Most of the instruction will be geared toward competition shooting techniques however, most of the skill sets will have application parallels in hunting and law enforcement scenarios as well.**

I ensure a professional and hands on environment. Emphasis is placed on continuous communication between Instructor and Student. As such, each Student is treated with respect as allowed within our ability to offer a safe training environment for all parties.

Favorable Student to Instructor ratios will be maintained. Because of the P.O.I. and tempo, **1 Mil Right** is limiting the number of available slots to 12 for this course.

**My goal is to improve your skills by challenging you and pushing you away from your comfort zone.**

There are many variables in every observation and shooting scenario that you are not in control of. We will put you in more control to increase your chance of mission success.

**1 Mil Right** will build your confidence, increase your imagination and enhance your ability to adapt so that you can place your shot on demand.

**PREREQUISITES :** This clinic will quickly push into intermediate and advanced shooting tasks. Students **MUST** know their gear and be familiar with Mil and/or MOA adjustments and terminology. **Students MUST be comfortable handling their firearm in a safe manner during movement and gun handling.**

**Rifle and equipment requirements for this course are listed in a separate Student Info Flyer.**

**TUITION for complete 3 day class: - - - \$750.00/student.\***

**\*Pala Shooting Range charges \$25.00 per person/ per day including instructors. These range fees are not part of the tuition registration price. Attendees will be responsible for paying the range fees directly to Pala Shooting Range.**
