Course Description

This is a technical marksmanship course tailored Law Enforcement Sniper/F.O.s

This course will cover precision rifle deployment and precision rifle fire under adverse and less than ideal conditions. **Unsupported rifle positions and efficient deployment will be the primary concentration.**

Individual skill assessments are made at the beginning and end of this course. Continuous feedback and data is given to the student so that you have something tangible to document your progress.

- P.O.I. includes:**
- * Proper Equipment Selection and Setup.
 - * Marksmanship Fundamentals refresher.
 - * Psychological training considerations and how to avoid training scars.
 - * Correct position building for unsupported standing, kneeling, sitting and prone.
 - * Follow through and weapon manipulation.
 - * Most work will concentrate on ranges from 10 to 330 yds.

Recommended Equipment List for this Clinic

- Centerfire Precision rifle with optic.
- Quality rifle sling suited to hands-free carry as well as positional shooting.
 - 300 rounds of quality ammunition.
 - Tripod (capable of mounting your rifle)
- Hearing Protection - Eye Protection.

NOTE: This block of instruction is centered on shooter development and building sound fundamentals that can be adapted to any high risk rifle engagement.

This course is NOT the place or time to “try out something new”. Get your gear sorted out, keep it basic and get very familiar with it prior to arrival at this course.

Per the title of this course, the goal is to prepare you to solve time and environment constrained problems successfully without the advantage of prior/pre-planned setup.

Range location does not show on Google Maps. Range co-ordinates/directions will be emailed to attendees a week in advance of the class dates.

Training Certs will be given to attendees successfully completing the course. T.T.P.O.A. will take care of providing documented course credit toward your training records.

Registration form can be downloaded via Word.doc icon at 1MilRt.com
